

SYSTEM CONTEXT LOCK

Agile AI Foundation — Institutional Theme & Surface Stabilization

Date Locked: 12 Feb 2026

Status: FINAL · STABLE · TAGGED (foundation-v1.1-theme-stable)

1. Canonical Authority Layer (agileai.foundation)

Purpose (Locked)

- Preserve and publish the authoritative definition of Agile AI Functional Elements.
- Remain neutral, non-commercial, and governance-controlled.
- Provide WHAT must exist — not HOW to implement.

Characteristics (Locked)

- Static site
- English canonical
- Stability-first evolution model
- Institutional language
- No training, certification, or monetization

2. Institutional Theme System (Locked)

Token Contract

- CSS Token Contract v1.1
- Light / Dark / System modes
- Explicit override via data-theme

- System fallback via prefers-color-scheme
- Print-friendly academic output

Theme Controller

- theme.js shared across public surfaces
- LocalStorage key: agileai-theme
- Persistent across pages

3. Architectural Separation (Locked)

Authority Flow:

Foundation → Learning → Assessment

- Foundation defines
- Learning interprets & applies
- Assessment evaluates alignment

Assessment and Learning never redefine the Functional Elements.

4. Brand Positioning (Locked)

Agile AI Foundation is:

- Independent
- Governance-driven
- Stability-first
- Non-commercial at authority layer

Tone:

- Institutional
- Durable
- Non-hyped

5. Surface Integrity

- Fully static
- SEO-ready
- Governance page separated
- Site notice aligned with theme system
- Unified theme behavior across pages

6. Prohibited on Foundation Surface

- Course selling
- Certification marketing
- Testimonials
- Salary claims
- Promotional language

Foundation is a definition authority, not a product site.

Phase Completion

This phase completes:

- Visual stabilization
- Theme system finalization
- Institutional alignment
- Governance clarity

Foundation surface is now considered Canonical Reference Layer — Stable.
